

My studio

I love birds. I dream about birds and they appear at my window and on my path at just the right moment; it seems this way, anyway. I have no idea why I love them so much but I do know that when they appear at dawn and dusk with their song and beauty they stir something beautiful inside me; I guess I'd call it a sense of awe or wonder. Like everything in nature they are a gift in my life and I am compelled to paint them and to share this gift with you. I believe that nature is always talking if we stop to listen.
